

Collected Critical Praise for the previous recordings of MLN

Almost impossibly beautiful. Dusted

It will slow down the passing world and maybe even alter the way you see the light coming in the window. If pain persists, put it on again.  
Sydney Morning Herald

Despite it's far flung origins and diverse input, Nicholson's music retains a clear authorial voice and purpose offering a series of panoramic variations, phased drones, vaporous trails and heavily processed cycles of ebb and flow. The Wire

Breath-taking and epic. Stretches and glides through a cornucopia of musical styles with consummate ease. A walk through an audio rainforest and beyond. Terrascope

Sweeping, skyward epics, worthy of Olympic closing ceremonies or peyote snacks by the "fire spot" in the woods... Prefix

Overwhelming compositional talents and production styles. Boomkat

Fans of The Books, Low, Animal Collective & Broken Social Scene need to hear this densely layered pop masterpiece. Reckless

A lyricist of wry wit and rare intellectual cunning, a poet who disses his subjects with a hearty, Zen-flavored circumspection. Lord only knows when Nicholson or anyone else will summon the wherewithal to complete another album this ambitious and absorbing. Flagpole

The Secret Miracle Fountain is an experimental rock album that glitters to its depths like a musical coral. A broad and startlingly mature representation of world musicianship with not so much as an instrumental ego in sight. Tangents

Galeria de la Luz is an album that is shared between families, between people with similar sensitivity. Masterpiece. Rock It To The Moon, FR

Will stun, astound and yes, possibly even bring you some much needed peace in your life. Treblezine

Stretches the ethereality of dream-pop into blissout, as strings, wordless vocals, and guitar bleed together in swatches of psychedelic color. Function argue convincingly that sometimes you have to leave the planning behind and go on instinct. Pitchfork (8.2)

Nicholson builds a perfect puzzle, both delicate and coarse, each piece is placed in the right place. Losing Today

Brilliant sound, inspired samples, field recordings, world music, elegiac melodies, the orchestra of a new era. Decouvrir Absolument

The raw thrashing of rustic instrumentation treads alongside mercurial, abstract electronics, forging a sublime juxtaposition. Nuemu

Orchestral ranks marshaled with stunning composure and restraint  
Uncut

Fits perfectly among the newest heroes on the edge of the singer/songwriter territory. Psychadelic Folk

The power of nature digitized and the heart of humanity released from its societal mores, all in one album Kyndmusic

The album is mystical and soothing. It offers an experience that is unapologetically contemplative and fully immersed in the realm of the ethereal. The album is not meant to exist in the world of philosophical reductionism or simplified physics. The Secret Miracle Fountain is an expression of free will, a foray into transcendentalism... with its woodsy, hinterland sounds, (the album) seems to borrow more from Emerson than from Indie rock. Ampcamp

Utterly beautiful. Quite enchanting. Pressplayrecord

The finest album to emerge from Australia this year. You have been warned. Adequacy

It occurs to me that I could type for days and come nowhere within the proper realm of "beginnings" in conveying the white magic Function delivers on album. SCTAS

### **Press for AT / ALL (with Pascal Babare and Lucy Roleff)**

"Space-age pop, a combination of gorgeous balladry and the 'Stranger Things' soundtrack. Invention lines every seam on 'Frequency', and it's a running theme on their fantastic first work."

[-DIY Magazine, premiering our second single, "Frequency"](#)

"The band has created a signature sound that masterfully blends fragments of electronic and pop."

[-Nylon, premiering "Night Body" video](#)

"Psychedelic, transcendental. We call it like we see it, and we're loving what we're seeing."

[- Impose, premiering "Deeper" video](#)

“A very smooth and groovy track that is filled with pure, heartfelt sunshine.”

[-The Fader, premiering our first single "Deeper"](#)

“SUN DOG twinkles and pulsates with synths and undulating swells and glitches that make the songs feel like stepping into a sonic kaleidoscope.”

[-Noisey, premiering Sun Dog full album stream](#)
